# Akbar Peerbhoy College of Commerce and Economics

*(NAAC Accredited College)*

M. S. Ali Road, Two Tank Grant(E), Mumbai - 08

## Certificate Course in Hardware and Basic Networking

**Course Objective:** course provides foundational understanding of hardware components, how to assemble a desktop computer. The Course will help you to learn about basic network addressing, network device connections and configuration.

**Course Outcome:** On completion you will get **"Certificate in Hardware and Basic Networking".** This certificate will help you in finding placement as Network engineer. Also you will be able to start your own hardware and Networking Company.

***Eligibility Criteria*: -** Minimum SSC ($10^{th}$) passed or appearing.

**(This batch is exclusively for registered students of Akbar Peerbhoy College)**

**Last Date** of Submitting Admission forms: **$20^{th}$ November 2021.**

**Click here for Online Registration: https://forms.gle/EhL3DEqmXVq8YjXXA**

New Batch Starting From: **$25^{th}$ November 2021.**

**Course Duration** – 3 Months *($25^{th}$ November 2021 – $24^{th}$ February 2022)*

**Limited seat,** Admission on **First Come First Serve Basis**

**Course Fees: ₹ 1650/- only**

**Experienced Faculty in field of Hardware for past 15 years.**

**For more information contact:**

| Mr. Feroz Patel | *(Course Mentor)* | |
| Mr. Noman Shaikh | *(Course Mentor)* | |

## Course Contents:-

The course spans over 4 weeks of extensive hands-on Project work under the guidance of the instructors by Maintaining Project Dairy on daily practical assignments completed using actual Hardware components.

### Module 1:– Computer and Hardware Fundamentals

- Θ Computer Fundamentals.
- Θ Basics of computer hardware.
- Θ Booting process, BIOS.
- Θ Different Types of Cache, Buses, Motherboards, Processors, RAM, ROM etc.
- Θ Different Types of Expansion Slots, Expansion Cards.

### Module 2:– Assembling of Desktop Computer

- Θ Assembling of Motherboards, Floppy & CD drives Hard disk on Latest Cabinets & Motherboards.
- Θ Total Assembling Of Computer
- Θ Usage of Multimeter, Voltages In SMPS, Beep Codes.
- Θ Jumper Settings, Master & Slave Settings, BIOS Settings.

### Module 3:- OS Installation

- Θ Hard disk Partition, formatting HD.
- Θ Windows Partition through Text & Graphical Mode.
- Θ Windows 7 / 10 Installation
- Θ Drivers Installation, Application Software Installation.
- Θ Virus, Antivirus Software & Removing Viruses.

### Module 4:– Networking

- Θ Basics of Networking, Types of Network Devices Hub, Cable, Connectors, LAN Cards etc.
- Θ Peer-to-Peer Networking Through Windows.
- Θ Software Proxy.
- Θ Local Area Network (LAN) Setup
- Θ Cabling Using CAT 5 Cable, Crimping tool Usage.

# Introduction

## Hardware and Networking

**What is a Computer?**

A Computer is an electronic device with information to store a "data". The word computer has come from a French word "to Compute", which means to calculate. It has the ability to store, retrieve, and process data. You can use a computer for executing basic office work like typing documents, send email, and surf the internet. You can also use it to handle spreadsheets, accounting, database management, presentations, games, and many more.

Every computer consists of two basic parts – hardware and software:

(1) **Hardware:** Is physical entity of your computer which means anything that has a physical structure and which can be touched such as the computer monitor, keyboard etc. It is also known as heart of the computer.

(2) **Software:** Is any set of instructions that tells the hardware what to do and also how to accomplish each task. It can be called as the brain of the computer.

### Electronic Numerical Integrator and Computer (ENIAC)

ENIAC's design and construction was financed by the United States Army, Ordnance Corps, Research and Development Command, led by Major General Gladeon M. Barnes.
The work on the computer began in secret at the University of Pennsylvania's Moore School of Electrical Engineering under the code name **"Project PX"**, with John Grist Brainerd as principal investigator.
The total cost was about $ 4,87,000, which equates to $ 68,16,000 (approx. 44 Crores) in 2017.

The construction contract was signed on June 5, 1943.

It was completed and introduced on 14$^{TH}$ Feb. 1946.

It was given a code name as 'Project PX'.

Chief investigator was John Grist Brainerd.

It was called as a "Giant Brain" by the press.

It took a human 20 hours in 30 seconds.

It measured 8 feet x 3 feet x 80 feet and weighed 27 tons.

It contained nearly 50 lakhs hand-soldered joints.

It consumed 150 KW of electricity. (Where 1000 watts = 1 Kilo Watts = 1 unit)

It occupied 1800 ft$^2$
